

Axl Imperial Smart External Diameter Measurement and Control Inline Automated Device

Brand: Axl Imperial
Product Code: S.10006
VAT: Not Included
Availability Upon Request:
support@intelligent-estore.com
Shipping Costs: Not Included

Price: €9,800.00

Short Description

The Axl Imperial External Diameter Measurement and Control Inline Automated Device allows to monitor and control and gather continuous data of the external diameter of cylindrical formed products as pipes, hoses, cables, optic fibers, etc. The monitoring of the external diameter of such products is vital for consistent, up - to - standards production, productivity and cost reduction.

Description

The monitoring of the external diameter of such products like pipes, hoses, fabric optics is vital for consistent, up - to - standards production, productivity and cost reduction.

The device offers continuous size samplings, alarms, USB or Ethernet outputs and HMI / SCADA connection ability.

All files can be extracted in CSV file and be displayed as simple excel sheet or graph.

Application can be used to provide 'real time' temperature measurements to IoT Platforms and Analytics like Microsoft Azure, SAP Cloud Platform, Google and AWS (via the ethernet port).

Measurements are extremely useful in plenty scenarios including:

- Machine Learning
- Predictive Analytics
- Continuous Costing
- Measure and track KPI's, keeping the production and product sizes under control or forecast future financial and production parameters.

Price: Starting Price 9,000 euros according to application and accuracy needed up to 17,000 euros

Applications:

Metal and Plastic Pipes and Hose Production / Cables Production / Optic Fibers Production / Tubes Production
